which I used (moderately and in small doses) at the first recurrence of a cold or any chest difficulty, and from which I invariably found relief. This was over 25 years ago. With all sorts of exposure, in all sorts of climates, I have never, to this day, had any cold nor any affection of the throat or lungs which did not yield to Arrar's Cherker PECTORAL within 25 hours.

Of course I have never allowed my-self to be without this remedy in all my voyages and travels. Under my own observation, it has given relief to vast numbers of persons; while in acute case of pulmonary infiammation, such as croup and diphtheria in children, life has been preserved through its effects. I recommend its use in light but frequent doses. Properly administered, in accordance with your directions, it is A Priceless Blessing

The creamery system of butter toaking has now become so well established in our own State and throughout New England, that farmers need not longer hesitate over starting the business in any locality where cows conceded on every hand that this is the best paying line of stock farming that a community of farmers can engage in. The business has now been carried on long enough to prove every claim the Furmer has heretofore made for it, and also to show its reliability as a means of raising money on the farm. We enjoined farmers to move cantiously in the matter at first, that the mistake might not be frequently repeated of establishing enterprises of the kind where there was not interest enough in dairying to make a success. Starting a business of the kind where it cannot succeed, not only loses money, where the purpose was to make it, but a failure will always discourage others who might make it a success, and who otherwise would be realizing its advantages.
